

Megapoxy®

The perfect brew: a floor with stamina and sparkle

Client: Vittoria Coffee

Location: South Australia

PROJECT SNAPSHOT

Coat and protect the 900m² floor of Vittoria Coffee's showroom and warehouse. This demanded both style and durability as the flooring includes two spaces: a service counter for purchasing coffee beans and a warehouse for goods to supply commercial customers.

Client needs + challenges

- Dust-free, hard-wearing coating.
- Excellent abrasion resistance.
- Easy maintenance and cleaning.
- High-gloss, coloured and stylish finish.
- Durability for both customer and forklift traffic.

Spray applied Megapoxy 132 Grey

Spray applied Megapoxy 132 Grey

Megapoxy 132 Grey

Solutions, service + simplicity

Working with Vittoria Coffee, Megapoxy 132 Grey – a high-strength epoxy coating ideal for commercial and industrial applications – was chosen for this project. We supported the client through application, which took place in hot summer temperatures.

- The team first removed all existing resin floor coatings and prepared the floor.
- When the surface was fully prepared, they applied one coat of Megapoxy 132 Grey combined with 10% Megapoxy thinners, allowing for a simple spray application. This was done early in the day before the day reached maximum heat.
- The next day, with the first coat completely cured, the second coat was also applied using spray equipment (again, during cooler earlier daylight hours).

PRODUCTS USED

- [Megapoxy 132 >](#)

Standout benefits

- Crucial speed and simplicity for application even in higher ambient temperatures.
- VOC-free and safe for food, beverage and catering applications.
- Hard-wearing, durable and robust.
- Timeless style, impressive shine.
