

Epoxy Paste Adhesive

Technical Data Sheet

| DESCRIPTION | Megapoxy PR is a specially formulated non-sag epoxy filling paste and adhesive. This easy to use two-part epoxy product, sets after mixing with excellent properties that is ideally suited for the following applications. Megapoxy PR is volatile organic compounds free (Nil VOC). | |
|-----------------------------|--|--|
| | | |
| RECOMMENDED APPLICATIONS | Bonding | Filling and Repair |
| | Natural Stone | Concrete pipes and tanks |
| | Precast Concrete Articles | Fibreglass articles |
| | Bricks and Ceramics | Concrete floors and stairs |
| | Metals | Concrete column |
| | Bricks and ceramics | Insitu formed concrete |
| | Grouting Bolts | |
| PROPERTIES | Mixing Ratio by Volume | 1 Part A to 1 Part B |
| | Work Time at 25°C: | 10 minutes |
| | Minimum Cure Time at 15°C | 4 hours |
| | Minimum Cure Time at 25°C | 2 hours |
| | Minimum Cure Time at 35° | 1 hour |
| | Minimum Application Temperature | 10°C |
| | Maximum Operating Temperature | 70°C |
| | Colour Part A | White |
| | Colour Part B | Natural |
| | Appearance Mixed | White |
| | Viscosity Part A at 25°C | 10-18 gram / 30 sec |
| | Viscosity Part B at 25°C | 4-8 gram / 30 sec |
| | Specific gravity Part A at 25°C | 1.40-1.50 |
| | Specific gravity Part B at 25°C | 1.30-1.40 |
| CURED PROPERTIES | Compressive Strength - ASTM D695-23 | 50-60 MPa |
| | Bond Strength Concrete - ASTM 4541 | >3Mpa |
| | Tensile Bond Strength Steel - ASTM D897-08 | 18MPa |
| | Dielectric Strength 50Hz @25°C(Kv/cm) | 190 |
| | Hardness - Shore D - ASTM D2240-00 | 70 |

Technical Data Sheet

CHARACTERISTICS

- VOC Free
- Simple 1:1 mix ratio
- · Creamy Texture, blend easily
- Non sag on vertical & overhead surfaces
- Adheres and cures under adverse conditions (cold & damp)
- · Good strength retention after prolonged immersion in water
- · High strength permanent bonds
- Excellent tensile and compressive strengths, superior to concrete
- Excellent chemical resistance
- Flash Point above 200°C

SURFACE PREPARATION

Concrete

Concrete should be free from grease and oil. If necessary, clean with industrial heavy duty degreaser. When clean, remove surface laitance. This is best done by mechanical abrasion such as scabbling, grit blasting or grinding. If this is not possible acid etching must be carried out. Mix concentrated hydrochloric acid with equal volume of water and spread at the rate of 0.5 litre per square meter of concrete surface. Allow to react for about 10 minutes and wash the area thoroughly and scrub with a stiff bristled broom to remove loose sand. Allow to dry for 24 hours. For maximum adhesion the concrete should be surface dry.

Metal Surfaces

Metals should be grit blasted to AS CK 9.4 - 1964 Class 3 finish. If this is not possible, mechanically abrade the surface to a clean, bright metal surface. Once this abrasion is complete, degrease the surface by flooding with an industrial grade degreaser. Wire brushing is not entirely satisfactory and gives minimal adhesion only.

Coated Surfaces

It is recommend to remove all coatings prior to bonding, bonding to coated surfaces will give inferior bond strengths compared to bonding directly to a prepared substrate.

Concrete:

The surface may be either flame-cleaned, or mechanically treated with a scutching tool, to remove all traces of paint. Complete the preparation by diamond grinding or scabbling.

Metals:

Steps should be taken to remove all paint and/or galvanizing. Good quality paint stripper should be used, followed by grit blasting or grinding to a bright metal finish.

IMPORTANT INFORMATION

It is essential that the correct mixing ratio be used and that the Part A and Part B are thoroughly mixed together before use. Inaccuracies and poor mixing will result in lower physical properties of the cured system and, if the error is sufficiently large, the system may not cure satisfactorily and discolour on ageing.

CLEANING

To keep mixing implements and working tools clean, use Megapoxy Thinners. Use disposable rubber gloves to protect hands and maintain proper industrial hygiene. For further details refer to the Megapoxy PR Safety Data Sheet.

PACKAGING

Megapoxy PR is available in 4lt & 20 litre kits. Product should be stored in cool dry store.

TECHNICAL SERVICE

All purchasers of Megapoxy Products, are encouraged to avail themselves of our Technical Service for our Megapoxy Products. The information in this Bulletin is correct at time of publication, however continual research and development is being carried out and specs may change without notice.
